

**LAURA K. MEREDITH**laurameredith@arizona.edu | [www.laurameredith.com](http://www.laurameredith.com)**CHRONOLOGY OF EDUCATION**

- 
- 2013 **Ph.D. Climate Physics and Chemistry**, Massachusetts Institute of Technology (MIT), Cambridge, MA. Dissertation thesis: "Field measurement of the fate of atmospheric H<sub>2</sub> in a forest from canopy to soil". Advisor: Ronald G. Prinn.
- 2005 **B.S. Chemistry**, Summa Cum Laude, California Polytechnic State University, San Luis Obispo, CA.

**CHRONOLOGY OF EMPLOYMENT**

- 
- 2026–2027 **Keating Family Endowed Professor for Interdisciplinary Research**, BIO5 Institute, University of Arizona.
- 2026– **Associate Professor**, Hydrology and Atmospheric Sciences (HAS), University of Arizona. *Affiliated Faculty in the Environmental Sciences Departments, Genetics & Global Change Graduate Interdisciplinary Programs, and BIO5 Institute*
- 2023–2026 **Associate Professor**, School of Natural Resources and the Environment (SNRE), University of Arizona.
- 2018–2021 **Director**, Biosphere 2 - Tropical Rainforest, University of Arizona, Tucson, AZ.
- 2017–2023 **Assistant Professor**, SNRE, University of Arizona.
- 2016 **Research Associate**, with Dr. Scott Saleska, Ecology and Evolutionary Biology, University of Arizona.
- 2014–2015 **Postdoctoral Fellow**, with Dr. Paula Welander, Environmental Earth System Science, Stanford University, Stanford, CA.
- 2006–2013 **Research and Teaching Assistant**, with Dr. Ronald Prinn, Massachusetts Institute of Technology, Cambridge, MA.

**HONORS AND AWARDS**

- 
- 2024 **SCIENCE Visiting Scholar**, University of Copenhagen.
- 2023 **Faculty Affiliate and Visiting Scholar**, Lawrence Berkeley National Lab.
- 2023 **Excellence in Postdoctoral Mentoring Award**, University of Arizona
- 2022 **Thomas Hilker Early Career Award for Excellence in Biogeosciences**, American Geophysical Union
- 2021–2026 **NSF CAREER Award**, Atmospheric Chemistry and Ecosystem Science Programs
- 2021 **Outstanding Faculty Mentor Award**, Undergraduate Biology Research Program, University of Arizona.
- 2021 **Research Faculty of the Year Award**, Division of Agriculture, Life and Veterinary Sciences, and Cooperative Extension, University of Arizona.
- 2021 **International Collaboration Award**, School of Natural Resources and the Environment, University of Arizona.
- 2020 **University of Arizona Team Award for Excellence**, Leader of Biosphere 2 – Water, Atmosphere and Life Dynamics team.
- 2019, 2020 **Campus RainWorks Challenge**, 2<sup>nd</sup> place national competition, Environmental Protection Agency.
- 2014–2015 **NSF Atmospheric and Geospace Sciences Postdoctoral Fellowship**, Stanford.
- 2013 **Outstanding PhD Thesis Award**, Carl-Gustaf Rossby Prize, Massachusetts Institute of Technology
- 2008 **Excellence in Teaching Award**, Massachusetts Institute of Technology
- 2006–2008 **NSF Graduate Research Fellowship**, Massachusetts Institute of Technology.

**PUBLICATIONS**

° Undergraduate and graduate student advisee or postdoctoral and staff mentee.

† Significant research product of Meredith lab. ^ Co-first authorship. \* Based on graduate work.

- |       |                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PI    | <b>National Science Foundation Atmospheric and Geospace Sciences (AGS) and Division of Environmental Biology (DEB).</b> "The future of the atmospheric hydrogen soil sink: is adaptation enough?" (\$1,72,000 Total Costs; \$451,524 Indirect Costs; \$1,268,476 Direct Costs; 7.51% effort; 2025)                                                                                                                                     |
| PI    | <b>Department of Energy Biological and Environmental Research Systems Biology.</b> "A volatile environment: How volatile mediated plant and microbial interactions extend the rhizosphere and enhance soil carbon storage" (\$3,424,395 Total Costs)                                                                                                                                                                                   |
| PI    | <b>National Science Foundation CAREER Atmospheric and Geospace Sciences (AGS) and Division of Environmental Biology (DEB) #2045332:</b> "CAREER: Unearthing the role of belowground biology in biosphere-atmosphere VOC exchange." (\$757,945 Total Costs; UA 9/1/21-8/31/26)                                                                                                                                                          |
| PI    | <b>National Science Foundation (NSF) Division of Environmental Biology (DEB) #2034192:</b> "SitS: Sniffing the Soil Volatilome: Decoding Microbial Interactions in Soil Systems using Subsurface Sensors." Co-PIs: J. Krechmer, D. Hagan, M. Tfaily (\$531,236 Total Costs; 1/1/21-12/31/23). Includes a FY22 REU Supplement.                                                                                                          |
| PI    | <b>National Science Foundation (NSF) Atmospheric and Geospace Sciences (AGS) #1933280:</b> "Advancing OCS as an independent atmospheric tracer for global photosynthesis through quantification of microbial-mediated sources and sinks in soils." Co-PIs: J. U'Ren, R. Commane, I. Baker (\$748,914 Total Costs; 1/15/20-12/31/22). Includes a FY22 REU Supplement.                                                                   |
| PI    | <b>Department of Energy (DOE) Facilities Integrating Collaborations for User Science #60045:</b> "Belowground genotype-phenotype controls on nitrogen use efficiency of a sorghum bioenergy crop." Co-PIs: M. Tfaily, J. R. Roscioli, D. Pauli, J. Shorter, J. Krechmer, A. E. Arnold (\$142,546-value user facility award, Joint Genome Institute and Environmental Molecular Sciences Laboratory core facility use; 10/1/21-10/1/22) |
| PI    | <b>DOE Joint Genome Institute Community Science Program Small Scale Sequencing Award #502880:</b> "Life on LEO - spatiotemporal characterization of the diversity and metabolism of incipient microbial life on the Landscape Evolution Observatory." Co-PIs: A. Sengupta, T. Volkmann, P. Troch. (\$0, sequencing award; 2017-2019).                                                                                                  |
| Co-PI | <b>National Science Foundation Signals in the Soil.</b> "SitS: Spatial and Temporal Mapping of Dissolved Organic Matter Transformations in the Rhizosphere Using                                                                                                                                                                                                                                                                       |

- Subsurface Gas and Aqueous Phase Probe Networks” PI: J. Robert Roscioli, Aerodyne Research, Inc. (\$1,199,958)
- Co-PI **Department of Energy Office of Biological and Environmental Research (BER) Environmental Systems Science** DE-SC0022135: “*Trees as conduits for connecting belowground microbial processes to aboveground CH<sub>4</sub> emissions at the Terrestrial-Aquatic Interface*”. PI: Scott Saleska (\$999,260 Total Costs; 09/01/2021-08/31/2023)
- Co-PI **Department of Energy (DOE) Office of Biological and Environmental Research (BER) Small Business Innovation Research (SBIR)** Phase II DE-SC0018459: “*Spatially-Resolved Microbial Activity Probe Using Infrared Measurements of Nitrous Oxide and Methane Isotopes in Soil.*” Lead PI: Rob Roscioli, Aerodyne Research, Inc., Billerica, MA. (\$1,500,000 Full Award; \$554,098 Total Costs; 5/28/19-5/27/22)
- Co-PI **DOE Office of Biological and Environmental Research (BER) Small Business Innovation Research (SBIR)** Phase I DE-SC0018459: “*Spatially-Resolved Microbial Activity Probe Using Infrared Measurements of Nitrous Oxide and Methane Isotopes in Soil.*” Lead PI: Rob Roscioli, Aerodyne Research, Inc., Billerica, MA. (\$225,000 Full Award; 5/3/18-1/8/19)
- Co-PI **Department of Energy (DOE) Facilities Integrating Collaborations for User Science** #50971: “*Rhizosphere effects on soil organic matter decomposition and microbial activity in a tropical rainforest under drought: unearthing aggregate- to ecosystem-scale contributions to carbon cycling through whole-ecosystem stable isotope labeling.*” PI M. Tfaily, Co-PIs: L. Meredith, J. U'Ren, B. Hurwitz, C. Werner, M. Dippold (\$88,000-value user facility award, Joint Genome Institute and Environmental Molecular Sciences Laboratory core facility use; 0% effort 9/1/19-9/1/21)
- SP **National Science Foundation Research Traineeship** Understanding Rules of Life #2022055: “*BRIDGES - Building Resources for InterDisciplinary training*”. PI: Scott Saleska (\$2,999,859 Total Costs; 09/01/2020-08/31/2025)

## PATENTS

2021 **Meredith, L.K.**, Moma<sup>o</sup>, P., and Volkmann, T.H.M. Patent application No. 63/187527 and Patent No. PCT/US22/28964 “IN SITU SOIL GAS PROBES AND SAMPLING SYSTEMS” filed 12 May 2021.

## TEACHING, ADVISING, AND MENTORSHIP

### Teaching

- 2026 **Severe Weather & Climate Change Impacts** (ATMO 180), 3-unit, undergraduate general education, online.
- 2026 **Atmospheric and Ecosystem Measurements** (RNR 497/597), 3-unit, upper division. *New course* supported by NSF CAREER
- 2025 **Sustainable Earth** (RNR150), 3-unit, undergraduate general education.
- 2022– **Vertically Integrated Program (VIP) on the Microbial Volatilome.** Multidisciplinary, team-based learning model that engages undergraduates (10 thus far) in faculty-led research supported by NSF CAREER.
- 2020–2022 **Teaching Fellow**, Biosphere 2 Innovative Faculty Teaching
- 2018, 2021 **Ecosystem Genomics Seminar** (RNR696/496-005), 2-unit, upper division undergraduate/graduate course. *New course*
- 2020, 21, 22 **Ecosystem Ecology** (RNR458/558), 3-unit, upper division undergraduate/graduate course using already developed materials.

- 2019 **Ecology of Water Harvesting** (RNR696-004/496-002), 1-unit, upper and lower division collaborative course on the integration of ecological and aesthetic principles in landscape design. *New course* supported by **Teaching Innovation Grant**.
- 2019 **Atmosphere-Biosphere Interactions** (RNR 555), 3-unit, graduate course. *Adapted to existing syllabus, developed all new course materials*
- 2018 **Instructor** (RNR 322), SNRE field course, soil and microbial dynamics.
- 2016 **Short Course Instructor**, Biodiversity and conservation in the tropics: a molecular approach, Universidade de So Paulo (USP) CENA. (1 month before faculty position in Fall 2016)
- 2019 **Participant**, National Ecological Observatory Network (NEON) Faculty Mentoring Network.

### **Advising and Mentorship:**

- **Masters theses advised:**
  - Phoenix Spivey (advisor, SNRE, Fall 2022–Fall 2024).
  - Meara Clark (advisor, SNRE, Fall 2021–Fall 2023).
  - Peter Moma (advisor, SNRE, Fall 2018–Spring 2021).
- **Doctoral theses advised:**
  - C. Allison Newton (advisor, SNRE, Summer 2020–Summer 2026).
  - S. Marshall Ledford (advisor, Genetics, Fall 2021–Summer 2026).
  - Parker Geffre (advisor, ENV5, Fall 2024-current).
- **Graduate students advised, not as primary advisor:**
  - Harrison Friedmen (SNRE, MS Fall 2021–Fall 2023)
  - Lia Crocker (advised on volatile organic compound measurements and interpretation, primary advisor Dr. Jana U'Ren, Biosystems Engineering, MS Spring 2020–Fall 2021).
  - Pablo Martinez Sosa (advised on microbiology, primary advisor Dr. Jessica Tierney, Geoscience, MS Spring 2017–Spring 2018, PhD Fall 2018-Spring 2022).
- **I have advised over 100 individuals at UA including 4 research specialists, 11 postdocs, 9 graduate students, 62 undergraduates, and 14 high school students.**

### **CONFERENCES AND SCHOLARLY PRESENTATIONS** (last 3 years)

#### **Invited seminars**

1. Oregon State University. "Beneath the Surface: volatile organic compound exchange of the soil and rhizosphere." Host Kimberly Halsey (July 2025)
2. CSIRO Future Science Platform on 'Microbiomes for One System Health' InterActive Biomes Initiative, online webinar, "A volatile environment: on the unique and widespread roles of microbial volatiles below ground". Host Gupta Vadakattu (September 2024)
3. University of East Anglia, Norwich, UK, "Sensitivity of soil microbial volatile organic compound metabolism to drought and rewet". Host Marcela Hernández (May 2024)
4. Cambridge University, Cambridge, UK, "Soil uptake of molecular H<sub>2</sub> in natural, urban and experimental systems". Host Nicola Warwick (May 2024)
5. University of Copenhagen, Denmark, "Microbial VOC cycling along the soil-plant-atmosphere continuum". Host Riikka Rinnan (April 2024)
6. Scripps Institute of Oceanography, "Microbial imprint on the atmosphere: Unearthing the microbial drivers of soil trace gas cycling". Host Christopher Charles (April 2023)
7. Bioscience Division, Los Alamos National Laboratory, "Green Infrastructure Impacts on Soil Health." Host Marie Kroeger (June 2022).

8. Earth System Science, Stanford University, "Sensitivity of soil microbial volatile organic compound metabolism to drought and rewet." Host Morgan O'Neill (June 2022)
9. Department of Geosciences, Princeton University, "Sniffing the soil: what subsurface soil gas and isotope measurements reveal about plant-microbe interactions, nitrogen cycling, and soil N<sub>2</sub>O and NO emissions." Host Linta Reji (March 2022).
10. Department of Ecology, Lawrence Berkeley National Lab, "Revealing ecosystem interactions through novel whole-ecosystem online stable isotope labeling and measurement approaches. Host Eoin Brodie (April 2021).
11. Ecology and Evolutionary Biology, Institut de Biologie de l'École Normale Supérieure, "Linking microbial genes to emergent outcomes in soil systems." Host Regis Ferrière (May 2019).

### Invited Presentations at Conferences and Symposia

1. International Society of Microbial Ecology Symposium, Auckland, New Zealand. **Meredith, L. K.** (August 2026)
2. Max Planck Institute for Biogeochemistry, Biogeochemical Processes Symposium, Jena, Germany. **Meredith, L. K.** (July 2026)
3. American Geophysical Union (AGU) Fall Meeting, New Orleans, LA. **Meredith, L. K.** "Soils as Engines of Volatile Exchange: Linking Belowground Processes to Atmospheric Chemistry" (December 2025)
4. American Society of Plant Biologists 2025: Global. **Meredith, L.K.** "Fate of Root-Derived Volatiles in Soil: Transport, Transformations, and Stabilization. (August 2025)
5. Biogenic Hydrocarbons and the Atmosphere Gordon Research Conference, Barcelona, Spain. **Meredith, L.K.** "Beneath the Surface: BVOC Exchange of the Soil and Rhizosphere" (June 2024)
6. European Geophysical Union General Assembly session on Eco-Omics: Harnessing meta-omics to understand the biogeosciences across scales: from the cell to Earth system. **Meredith, L.K.** Integrating multi-omic and isotopic approaches to identify plant-microbe interactions driving N<sub>2</sub>O emissions from agricultural soil" (April 2024)
7. Microbes Persist: Soil Microbiome Science Focus Area Meeting, invited plenary talk, Livermore, CA. **Meredith, L.K.** "A volatile environment: integrating volatiles and 'omics to investigate soil microbiomes and their function". (January 2024)
8. DOE Genomic Science Program Annual PI Meeting. **Meredith, L.K.** "Volatile Mediated Plant and Microbial Interactions and Their Potential to Extend the Rhizosphere and Enhance Soil Carbon Storage". (April 2024)
9. \*Microbial Cycling of Volatile Organic Compounds, Microbiological Society, Norwich, UK. **Meredith, L.K.**, Honeker°, L.K. (*presenting author*), Pugliese°, G., Friere Zapata, V.E., Ayala-Ortiz, C.O., Ingrisch, J., Tfaily, M., Williams, J., Werner, C., Ladd, S.N., and the B2 WALD Team "Sensitivity of soil microbial VOC metabolism to drought and rewet". (May 2022)
10. \*American Geophysical Union (AGU) Fall Meeting, New Orleans, LA. **Meredith, L. K.**, Werner, C., Ladd, N. S., Pugliese°, G., Honeker°, L. Ingrisch, J., van Haren, J., Tfaily, M., Williams, J., The WALD Team. "Soil-microbe-plant feedbacks to ecosystem drought in a model tropical rainforest ecosystem" (December 2021).
11. \*American Geophysical Union (AGU) Fall Meeting, New Orleans, LA. **Meredith, L. K.**, Roscioli, J. R., Shorter, J., Krechmer, J., Gil-Loiaza°, J., Lunney, E., Clark°, M., Grigory°, J., Pauli, D., Demieville, J., Werner, C., Ladd, N. S., The B2 WALD Team. "Subsurface stable isotope approaches for resolving nitrogen transformations in the critical zone" (December 2021).
12. \*Integrated Land Ecosystem Atmosphere Processes Study (iLEAPS) Conference, Session on the role of soil and microorganism in affecting the global carbon and water

- cycles. **Meredith, L. K.** "Belowground perspective on soil microbial volatile cycling" (18 March 2021)
13. \*American Geophysical Union (AGU) Fall Meeting, San Francisco, CA. **Meredith, L.K.**, Gil-Loaiza°, J., Roscioli, J.R., Shorter, J.H., Krechmer, J.E. "Integrating Soil Genomics into the Study of Biosphere-Atmosphere Trace Gas Fluxes." (December 2019)

### SYNERGISTIC ACTIVITIES AND SERVICE

---

- 2023– **Associate Editor**, Global Biogeochemical Cycles (AGU)
- 2020–2023 **Chair/Member, AGU Fall Meeting Planning Committee**, Biogeosciences Section
- 2021 **AGU Fall Meeting Convener**, "Microbial sources and sinks of volatile organic compounds (VOCs)"
- 2020 **Panelist**, BIO5 Inspiring Women in STEM, UA.
- 2019 **AGU Fall Meeting Convener**, "Ecosystem-scale interactions using large-scale stable isotope labeling"
- 2019 **Participant**, EMSL Ecotron workshop, DOE Pacific Northwest National Lab, Richland, WA.
- 2017 **AGU Fall Meeting Convener**, "Advancing Understanding of Hydrological and Biogeochemical Interactions in Terrestrial Ecosystems Through Large-Scale Model Systems"

### LEADERSHIP

---

- 2019- **Co-Lead of International Research Campaign**, Dr. Meredith led the Biosphere 2 Water, Atmosphere, and Life Dynamics Campaign (B2WALD) with Drs. Christiane Werner and Nemiah Ladd of University of Freiburg. The 5-month campaign applied ecosystem-scale isotope labeling across drought in Tropical Rainforest biome, involving >90 participants, 14 institutions, 5 countries, \$5M in instrumentation, >25 media events. With the first paper published last year in *Science* (Werner, Meredith, Ladd, et al., 2021).

### PEER REVIEWER

---

#### Funding agency panels and ad hoc

2018-2025 DOE, NSF, NASA, Simons, ERC

#### Journals (37 journals, ca. 12 reviews/year)

**Journals:** Agronomy, Applied and Environmental Microbiology, Applied Soil Ecology, Atmospheric Chemistry and Physics, Atmospheric Pollution Research, Biogeosciences, Biology and Fertility of Soils, Communications Earth & Environment, Ecosystems, Elementa, Environmental Microbiology, Environmental Science and Technology, FEMS Microbiology Letters, Frontiers in Microbiology, Functional Ecology, JGR Biogeosciences, Geoderma, Geoscientific Model Development, Global Biogeochemical Cycles, Global Change Biology, Limnology, Microbial Ecology, Molecules, Nature Communications, Nature Reviews Chemistry, New Phytologist, npj Climate and Atmospheric Science, PeerJ, Science of the Total Environment, Scientific Reports, Soil Biology and Biochemistry, Soil Ecology, Soil Science Society of America Journal, Soil Systems, Soils, The ISME Journal, Trends in Microbiology. Book chapters: American Society of Agronomy (ASA), Crop Science Society of America (CSSA), and Soil Science Society of America (SSSA). Books: n/a.

**SELECTED MEDIA COVERAGE OF RESEARCH**
